## **COMPUTER RECYCLING DAY**

Vann Data's annual Computer Recycling Day This Thursday!

Vann Data is hosting a technology and electronics recycling drive on Thursday, April 13, 2017. This annual event provides a valuable opportunity for residents and businesses of Volusia County to dispose of their old electronics for free, with the peace of mind that their devices will be properly handled by one of the state's leading certified e-recyclers, A-1 Assets of Longwood.

The collection event will be held on Thursday, April 13th, from 10am-2pm, in the parking lot of Vann Data, 1801 Dunn Avenue in Daytona Beach. At that time, computers, servers, LCD and CRT monitors, printers, phones, office equipment, stereo systems, circuit boards and many more types of electronics will be accepted.

**All items will be accepted, reusable or not. The only item not accepted is televisions.**

“In the nine years Van Data has offered this service to our community, we have collected over 98 tons of discarded computer equipment, reducing the amount of hazardous materials and electronic scrap in our landfill,” says Janice Huffstickler, President of Vann Data Services.

**For more information, please contact Vann Data at 386-238-1200.**
